

STUDY ON

A little about app

We are looking to create an app which makes a good connection between students and teachers. We are building an app which is reliable for teachers, students & parents. You can use this app in school, colleges and universities. Using this app teacher can give assignments and other study materials to the students. It is the fast way to take attendance of the students, to share study problem with teachers, to check the grades etc.

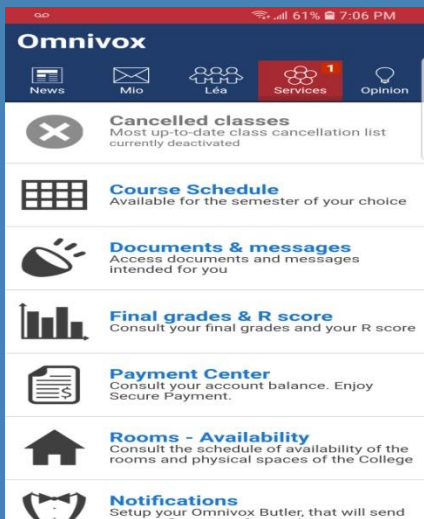

Features

- Course Schedule
- Message Box
- Calendar with everyday college schedule
- Course Document
- Grades
- Latest News & Events
- Feedback to teacher by students
- College and course details
- Know about teacher

Comparison

In the omnivox there is only two option of sign up one for student and second for employee whereas in our app we have three option third one is for parents.

Our app have a option of reminder in which app give a messeage to student when he/she didn't submit any assignment before the deadline.

New Features

- Login as parent -

Login as parent is a new feature of our app which is very helpful for parents. Parents can check the every activity of their children and also do chat with the teachers of their children.

- Reminder -

Reminder is very helpful for students. If any student forget to submitted the assignment then he/she get a notification sometime before the deadline. Student also get reminder about their exam.

- Attendance -

Teacher do not need to say every student name in the class and mark their attendance. Teacher just write a

code on board and set time and date. Then student mark their attendance by sending that particular code. It save a lot of time.

- Details about teacher -

Teachers must submit some personal detail about them like name, their education, experience . So, parents and student know about teacher experience and education.

- Assignment -

If any student is absent in the class when teacher give the assignment then he/she can't get that assignment.

- Teacher Updates -

Teacher have to give every month report to the parents things that he/she teach in the class .

- Suggestion Box -

If any student not doing well in the studies then teacher can message the student and give suggestion to improve their study .

Why we do it

- In this app teacher can give assignments to students whenever they want even the teacher is absent .
- This app is time saving for students and teachers.
- We are making this app not only for students and teachers but also for parents of students . In this app parents can check the grades , attendance etc of their children. Parents do chat with their children teachers .
- By using the chat feature students can share their study problem with their teachers .
- Teachers also provide notes and study materials to students for their exam . So that can easily prepare their exam .

Target Audience

- Student use this app because this app is very useful for their study.
- Teachers use this app to give online assignment to their student and they can easily get connected any student parents .
- This app is very useful for parents . Parents can easily check the performance of their children and they can get monthly overview of teacher that teach in the class.

Why Download the App

- It will save a lot of time .
- Parents do not need to go their children school . They can check their children grades , assignment and other activities anytime , anywhere at just single click .
- Students get information about their course subjects and assignment .
- To know the latest news and other activities of the college .

Goal of the app

Goal of our app to make study more convenient . Student get every information about their study at one click he/she not have to make any note. Parents get every single updates about their children performance in the study. Students cannot hide anything from their parents .
